

## PRESS RELEASE FOR IMMEDIATE RELEASE

**ATHENS, September 15, 2025**

### **STONETECH: €10 Million Investment in New 75,000 m<sup>2</sup> Production Facility in Ypato**

Celebrating 50 years of continuous growth, [STONETECH](#) — a vertically integrated leader in natural stone processing and trading — announces the launch of its new state-of-the-art production facility in Ypato, Viotia.

This strategic investment of €10 million over five years strengthens STONETECH's production capacity, technological edge, and international competitiveness.

The facility spans 75,000 m<sup>2</sup>, including 10,000 m<sup>2</sup> of specialized production and storage areas, and is equipped with advanced robotic cutting systems, automated processing lines, and digital mapping technology. These capabilities deliver operational excellence, production flexibility, and faster execution of large-scale orders.

Aligned with [STONETECH's](#) sustainability vision, the facility integrates the principles of the circular economy. It sources up to 80% of its energy from renewables, reuses 95% of its water, and ensures full recycling of marble by-products.

As a central hub for production, commercial support, and product showcasing, the facility includes a dedicated Slab Showroom featuring premium materials from both Greek and international quarries. Its scale and efficiency are expected to accelerate growth in key global markets, where exports already account for 40% of the company's turnover.

[STONETECH's](#) owned quarries remain a cornerstone of its production self-sufficiency, ensuring a consistent supply of raw materials and strict quality control. The new infrastructure builds on these strengths, enhancing responsiveness and operational agility.

The investment has also generated new employment opportunities, with the workforce projected to grow by 30%, prioritizing local recruitment and partnerships with regional suppliers — a move that further supports the economy of Viotia.

## Statement from CEO Nikos Gonianakis

*"This facility represents the next step in a vision that has always guided us. It is more than an investment in infrastructure — it is a strategic commitment to innovation and to advancing the global competitiveness of Greek marble."*

## Note to Editors

Founded in 1975 in Heraklion, Crete, [STONETECH S.A.](#) is a vertically integrated and outward-looking company specializing in natural stone and engineered surface processing and trading. The company operates production units in Crete and Ypato, Viotia, owns private quarries, and is the exclusive distributor of Neolith in Greece.

With 40% of turnover derived from exports, STONETECH is trusted for large-scale projects across Greece and internationally, supplying high-quality materials and services to professionals and businesses. It employs over 100 people and invests consistently in innovation, production, and sustainable development.

Flagship projects include Four Seasons in Greece, LG HQ Australia, Dior, The Ritz Carlton Maui, AmanZoe, JW Marriott, Hilton, One&Only, Grand Resort Lagonissi, DIOR shops, Rosewood Luxury Residences in Beverly Hills, the Goulandris Foundation and more.

Its vision is to promote Greek marble worldwide, both through wholesale distribution and landmark projects.
